THE

ELECTRICAL WORLD

A REVIEW OF CURRENT PROGRESS IN ELECTRICITY
AND ITS PRACTICAL APPLICATIONS

VOLUME LIII

JANUARY 2 to JUNE 24, 1909

NEW YORK

ELECTRICAL WORLD

INDEX TO VOLUME LIII

GENERAL INDEX

Entries from the Digest of Current Electrical Literature are indicated by D (Digest) and D R (Digest Reference)

A

Accidents:
——Employees, in U. S., Statistics, 100
——Prevention of, German regulations, (D.) 931
Accounting:
——Branch-office accounting, 1486
——Cost accounting, 1489
——Customers' accounts, 1487
——Effect of new methods on central stations. By J. S. Thornton, 576
——Need for better methods, 1519
——New York Public Service Commissions, System of, 928, 1446
——Ontario conditions, 1143
——Pay-roll problems, 1488
——Report, N. E. L. A., 1485
——Telephone, Chicago report on proposed methods, 195
——Wisconsin classification, 503, 1029
Accumulators (See Storage batteries)
Advertising (See Central-station business)
Air-gap reluctances. By W. Hartnell, (D.) *877; R. Livingstone, (D.) 981
Air-pump, Varwig automatic electric, *63
Alaska-Yukon-Pacific Exposition, Electrical engineering features. By A. T. Quigley, *678, *881, 1363
Alloy, Heusler magnetic. By J. G. Gray, (D.) 170
Alpha particles, Nature of. By Rutherford and Royds, (D.) 515
Alternating-current apparatus, Development in, 1908, 6
——From a galvanic cell. By W. Kistiakowsky, (D.) 1318
Alternating current from a galvanic cell. By W. Kistiakowsky, (D.) 1318
Alternating-current circuits:
——Dielectric losses. By C. Kinsley, (D.) 286
——Even harmonics in. By C. P. Steinmetz, 734, 979; Comment, 714; G. W. Patterson, M. G. Lloyd, 875; J. F. H. Douglas, 979
——Graphical diagram for power in. By J. I. Brewer, 217; Comment, 382
Alternating-current distributing system, Development of. By H. B. Gear, (D. R.) 224
Alternating-current industrial power plants. By W. H. Miller, *1376
Alternating-current measurements by potentiometer methods. By C. V. Drysdale, (D.) 580
Alternating-current transmission lines, Influence of frequency on the equivalent circuits of. By A. E. Kennelly, *211; Comment, 254
Alternators:
——Compounding, by means of a condenser. By W. Linke, (D.) *1396
——Field core for turbo-alternator. Sulzberger patent, *149
——Fluctuations in speed of rotors of alternators operating in parallel. By G. H. Shepard, *271; Comment, 254
——G. E. separately excited revolving-field, belt-driven, *126
——Heating of, 1389
——Hunting troubles in parallel operation. By E. Rosenberg, (D.) 511
——Parallel connection. By F. Lutz, *577
——Short-circuits on. By E. J. Berg, (D.) 409
——Synchronizing, Automatic, 535; (D.) *577
——Tests of, Potier simplified method. By P. Girault, (D.) 877
——Theory. By Lyle, (D.) 1396
——Torque characteristics, *358
——Turbo-alternator construction. By A. C. Tolben, (D.) 578, 641
——Wave form of e.m.f., Improving, (D.) 1174
Aluminum:
——Electrolytic reduction. By M. de Kay Thompson, (D. R.) 123
——Impurities in. By H. Pecheux, (D.) 1398
——Welding of, (D. R.) 122
Aluminum in conductors. By Dusaugey, (D. R.) 1552
Aluminum works, British, (D. R.) 123
Amalgamation process, Electrochemical. By E. E. Carey, (D.) 1177
Ambulance, Waverly electric, *1119
American Association of Electric Motor Manufacturers, 434, 1363
American Electrochemical Society, 487, 779, 958, 1144
American Institute of Chemical Engineers, 99
American Institute of Electrical Engineers:
——Anniversary dinner, 390, 442, 484, 539, 610, *668
Am. Inst. of Elec. Eng.: (Continued)
——Annual convention, 1066
——Boston Section, 320, 618, 776, 1437
——Chicago Section, 619
——Fort Wayne Section, 202, 489
——Frontenac convention, 1434
——Ithaca Section, 319, 672
——Minnesota Section, 487
——Officers, 1434
——Pittsburgh Section, 321, 489, 721, 1012
——Toronto Section, 98
——Veterans, List of, 14, 617
American Railway Engineering and Maintenance of Way Association, 720
American Society of Hungarian Engineers and Architects, 390
American Society of Mechanical Engineers, 959, 960
American Street & Interurban Railway Association, Convention committee, 960
American Telephone & Telegraph Co., Annual report, 763, 769
Ammeter, Induction. By P. MacGahan, (D.) 353
Ampere-hour meters. By A. Schwartz, (D.) *287
——Direct-current amp-hour. By J. Busch, (D.) 744
——Mercury type amp-hour, *584
——Sangamo amp-hour, *1047
Annealing furnaces, Electric, for hardening and tempering high-class tools. By J. B. C. Kershaw, *448
Annunciators, Electric, *73, *1117
Arc, Singing, 1389
Arc lamps:
——Comparison with other sources of light as to cost. By A. Linker, (D.) 1316
——Discharge of electricity from glowing carbon. By Pollock and Rancland, (D.) 742
——Disk-arc lamp, English, (D.) 1111
——European direct-current arc-lamp practice. By B. Monasch, (D.) *1110, *1175; Comment, 1141
——Flame:
Adams-Bagnall regenerative, *1339
"Angold" magazine, (D.) 578
"Aurola" direct-current, *699
Development. By T. Stave, 696
Double-electrode British lamp, (D.) 512
Enclosed, "Blow" gives steadiness, (D.) 578
Excello, with prismatic inner globe, *65
Gravity feed, 584
Jandus "regenerative," (D.) 512
Jones enclosed, (D.) 742
Maintenance cost. By L. J. Auerbacher, 646
Moul patent, (D.) 642
New form, with two pairs of electrodes, (D.) *694
"Rebofa" lamp, (D.) *641, 1039
Regulation. By P. Hoegner, (D.) 1397
Tariff, 848
Thomson-Houston, (D.) 223
Toerring, *1335
Ventilating ash trays, *414
Ventilation, Koerting & Mathiesen patent, (D.) 642
Vertical electrodes, Alba, *464
Victor, (D.) *578
——High-efficiency, Unfavorable experience with, in industrial plants. By W. H. Miller, 1085; Comment, 1062
——History of, 805
——"Intensified" inclosed arc. By W. D'A. Ryan, (D. R.) 1495
——Jandus patent, (D.) 1494
——Kalkner patent, 1033
——Light emission and absorption of carbon arcs. By Rosenmüller, (D.) 1600.
——Magnetite, Steinmetz patent, 852
——Mantle arc lamp, Ladoff patent, 673
——Photographic, (D.) 579
——Present status, N. E. L. A., 1472
——Preventing deposit on globes, Davy patent, (D.) 1231
——Regulation of. By J. Teichmüller, (D.) 121, 169; C. Hein, (D. R.) 410
——Restarting of carbon arc. By J. A. Pollock, E. M. Wellisch and A. B. B. Ranclaud, (D.) 981
——Small, "Venus," *1331
——Technics of arc lamps. By B. Monasch, (D.) *1110, *1175; Comment, 1141
——Therapeutical purposes, (D. R.) 1495
——25-cycle circuit, G. E., *828
——25-cycle service. By H. C. Reagan, 42
Arkansas Association of Public Utility Operators, 1204
Armature reaction. By E. Siedek, (D.) 350. G. Kapp, (D.) 1599.
Armature reaction of direct-current dynamos and motors. By H. Scholl, (D.) 223
Armature teeth, Flux density in. By F. Blanc, (D.) 284, 1175
Armatures:
——Cooling, Artificial. By G. Ossanna, (D.) 1549
——Flywheel effect in. By H. Luckin, (D.) 577
Armory wiring, Brooklyn, N. Y., 455
Armour Engineer, 1151
Artificial electric lines, 262
Ashes removal with Darley suction conveyor, *63
Association of Car Lighting Engineers, 1432
Association of Central Station and Electric Vehicle Companies, 717
Association of Edison Purchasing Agents, 14
Association of Iron and Steel Engineers, 1573
Association of Licensed Automobile Manufacturers, 288
Atlantic City, Lighting conditions, *1280
Atmospheric electricity. By P. H. Dike, (D. R.) 644; Makower, White and Marsden, (D.) 1112
Austria, Electrical industry in. By E. Honigmann, (D. R.) 1400
Autobuses:
——Gasoline-electric, (D.) 411
——Trackless trolley, (D.) 817
Automobile business of central stations:
——Boston. By L. D. Gibbs, 453, *736, 1101
——Buffalo, N. Y. By G. J. Kirchgasser, 1028
——Census of, 1061
——Chicago conference, Electric Storage Battery Co., 736, 850
——Cleveland, 974
——Discussion. By F. T. Kitts, 635
——Electric Vehicle and Central Station Association, Meeting, 901
——General Vehicle Co., Long Island City, 1179
——Hartford, Conn., 736
——Indianapolis, 571
——Minneapolis, 806
——New Jersey automobile charging. By W. H. Stuart, 869
——New York Edison Co. By N. G. Meade, *923
——Pasadena, Cal., 978
——Relation of the central station to the automobile business. By E. W. Lloyd, 870; J. T. Hutchings, 1482
——Rockford, Ill., 806
——Salem, Mass., Battery charging, 1166
——Situation, 534, 541, 717
——Toledo, Ohio, *571
Automobile steering-wheel switch, *1121
Automobiles, Electric:
——Babcock, *1501
——Baker, *1500
——Broc, *1503
——Columbia, *1501
——Columbus, *1502
——Discussion. By E. Sieg, (D.) 169, 224
——Lighting, Electric. By A. Soulier, (D.) 458
——Practical application of the modern vehicle, 1366
——Rauch & Lang, *1502
——Studebaker, *1500, *1607
——Woods, *1501

B

Babbitt Soap Factory Wiring of, *783
Baekeland, L. H., *1145
Bahia, Brazil, Electric lighting at. By A. H. Keleher, *629
Balancing a three-wire network. By B. Sankey, (D.) 352
Baltimore, Damage by "Inaugural" blizzard, 665
Battery capacity for a given load, Calculation of. By W. Lulofs, (D.) 225
Battery load regulator, *412
Belts:
——Cleaning, from oil, 341
——Defective drives. By Robert Greer, *567
——Keeping on pulleys. By John Jackson, 45
Bergenport Chemical Works, Electrical equipment of. By W. H. Miller, *498
Beta rays. By Pound, Makower and Campbell, (D.) 286
Bins, Supporting planking for. By James Francis, *566
Biscuit factory, Electricity in, 1014
Bit, Triangular, for boring square holes, *172
Bleaching plant, Electric power in. By Bachrach, (D.) 695
Blue-print drying frame. By H. During, *47
Boiler compounds. By A. E. Michel, 67

*Indicates illustrated articles.

208525

Boiler regulations, Germany. By A. Lang, (D. R.) 1398
Boiler-room routine of Rockford Electric Co., *920
Boiler-tube cleaners:
——Feeding device for, *519
——Rotary, *69
——Vacuum cleaning process, (D.) 742
Boilers:
——Corrosion from electro-chemical causes, 201
——Draft control, Automatic, *987
——Feed-water (See Feed-water)
——Feeding and blowing off a horizontal tubular boiler. By K. Walters, *1099
——Firing. By F. R. Wadleigh, (D. R.) 59
——Forced draft. By W. H. Wakeman, *42
——Loss of heat transmission from flue gases to water. By J. T. Nicholson, (D.) 1316
——Scale and corrosion. By J. C. W. Greth, (D.) 644
——Scale prevention and removal. By W. H. Wakeman, *1383
——Soda ash, Effect of, in feed-water, 1100
——Tar-burning, Elyria, Ohio, *28
——Tests by Marion Light & Heating Co., 563
——Yorkshire. Construction and advantages. By W. H. Casmey, (D.) 817
Book reviews:
——Alternating-Current Machines. By Sheldon, Mason and Hausman, 1604
——American Electric Railway Practice. By Herrick and Boynton, 1603
——Chemischen Stromquellen der Elektrizität. By Curt Grimm, 1499
——Controle des Installations Electriques. (Appendix.) By A. Mommerqué, 1603
——Copper Handbook, 1114
——Definition et la Mesure Industrielles de l'Acceleration des Trains. By C. O. Mailloux, 1498
——Development and Electrical Distribution of Water-Power. By Lamar Lyndon, 1320
——Dumb No Longer. By F. Deland, 1603
——Einführung in die Maxwellsche Theorie der Elektrizität und des Magnetismus. By C. Schaeffer, 1499
——Einführung in die Theorie des Magnetismus. By R. Gans, 1603
——Electric Furnace in Iron and Steel Production. By J. B. C. Kershaw, 1603.
——Electrical Engineering. By C. P. Steinmetz, 583
——Electrical Illuminating Engineering. By W. E. Barrows, 582
——Electricity and Magnetism. By J. H. Jeans, 583
——Elektrochemie. By Dr. Heinrich Danneel, 934
——Elektro-Engenieur Kalender, 1909, 745
——Fowler's Electrical Engineer's Handbook, 582
——Handbuch der Elektrischen Beluchtung. By Herzog and Feldmann, 1498
——Heat, Energy and Fuels. By Hanns von Jüptner, 582
——High-Tension Underground Electric Cables. By Henry Floy, 1320
——Hughes and Baudot Telegraphs. By Arthur Crotch, 1321
——Hydro-Electric Plants. By R. C. Beardsley, 1321
——Induction Coils. By H. Armagnat, 583
——Jahrbuch der Drahtlosen Telegraphie und Telephonie. By Dr. Gustav Eichhorn, 934
——Lady of the Dynamo. By A. M. Shaw and C. Beckwith, 1113
——Logarithms and Squares. By C. Smoley, 583
——Logarithms for Beginners. By C. N. Pickworth, 1603.
——Merveilles de L'Electrochemie. By Emile Guarini, 985
——Metallurgy of Iron and Steel. By Bradley Stoughton, 1603
——Naval Electricians' Text-Book. By W. H. G. Bullard, 1321
——Princip und Wirkungsweise der Technischen Messinstrumente für Gleichstrom. By Fritz Hoppe, 1498
——Récents Progrès du Système Metrique. By C. E. Guillaume, 985
——Regulier problem in der Elektrotecknik. By A. Schwaiger, 1498
——Rubber Trade Directory, 582
——Social Engineering. By W. H. Tolman, 581
——Street Railway System of Metropolitan Boston. By A. E. Pinanski, 1114
——Transient Electric Phenomena and Oscillations. By C. P. Steinmetz, 1321
——Transmission Calculation. By L. W. Rosenthal, 583
——Vectors and Vector Diagrams Applied to the Alternating-Current Circuits. By W. Cramp and C. F. Smith, 1042
——Wasserkraftmaschinen. By A. v. Thering, 1498
——Who Makes What, 985
——Wiederstands - Bestimmungen. By Fritz Hoppe, 985
Booster system, Pirani, modified. By Stirm, (D.) *983
Boring mill, Colburn thirty-four inch, *698
Boston:
——Automobile business, 453, *736, 1101
——Consolidation of lighting properties, Hearing, 1528
——Diagram of Edison high-tension system, 39
——80-cent gas bill defeated, 952
Boston: (Continued)
——Fan motor experience, 559
——High-potential underground transmission, *38
——Lecture course for Edison employees, 147
——Lexington plant added to Edison system, 615
——Lighting contract, Second, 1572
——Lighting situation, 854, 1061, 1066
——Minimum meter charge, Hearing on, 954
——Operating features of Edison station, *1283
——Operating features of elevated system, 320
——Power plant extensions, *445
——Sportsmen's show, 15
——Station work of elevated, 431
——Telephone switchboard, New, Fort Hill exchange, 385
Boston Edison Co., Purchase of suburban companies, 1068
Boston Edison Employees' Club, *778
Boston Motor and Power Boat Show, 362
Box-car loader, Motor-driven, *173
Brakes, Friction, Design of. By H. D. James, (D.) 351
Brakes, Railway:
——British report, (D.) 59
——Measuring friction. By J. C. Rennie, (D.) 513
Brakes, Track, Discussion of tests. By H. M. Sayers, (D.) 982
Braking action of repulsion motor, Milch patent, *1264
Braking, Regenerative, with series motors, British patent, (D.) 122
Brazil, Power in, 16
——(See also Bahia; Para; Rio de Janeiro)
Brewery, Pabst, Electric motors in. By William Keily, *323
Brick and tile plants, Electric motors for, 501
Bridge, Ore, Carnegie Steel Co., *417
British Physical National Laboratory, Annual report, (D.) 931
Brookline, Mass., Report against municipal ownership, 774
Brooklyn, Educational course of Edison Co., 621
Brownell, O. E., *1009
Brush holder, British, (D.) 578
Brushes:
——Securing conductors to carbon brushes, *489
——Sliding of, and conditions of equilibrium. By C. Richter, (D. R.) 409
——Walker patent on double brush for rectifiers, (D.) 121
Buckeye Electric Co., Cleveland branch, 1237
Budapest news-telephone service, 442
Buffalo, N. Y., Electricity in. By G. J. Kirchgasser, 1083; W. N. Ryerson, 1314
Buffalo General Electric Co., 542
Bushings:
——Brass insulated, Sprague, *464
——Krantz porcelain-lined, *647
——Watertight stuffing, Sprague, *293
Business conditions, 431

C

Cable junction box, Ricker, *228
Cable rates:
——Agitation for lower, 149
——Defense by G. C. Ward, 201
——Reduction, 616; by W. J. Camp, 741
Cables:
——Armoring for trailing cables, (D.) 743
——Design of underground mains. By J. R. Dick, (D.) 644
——Faults, Location of. By H. Mauradian, 1165; Comment, 1140
——Heating of. By L. Lichtenstein, (D.) 1233
——Lead-covered, Fulton, N. Y., Aerial line, 1200
——Lead sheath deterioration, 673
——Splicing lead-covered, 333
——Steel-tape, Simplex, 1121
——Submarine, Limitations in carrying capacity. By S. G. Brown, (D.) 880
——Testing. By H. Ohlson, (D.) *1113
——Testing apparatus, (D.) 62
——Testing of live cables, 1063
——Use of words wire and cable, 163
——(See also Wires and wiring)
Cadmium cells, Short-circuiting of. By P. I. Wold, (D. R.) 461
Calcium carbide and cyanamide plant on Norwegian coast, (D.) 1117
Cambridge, Mass., electrical department troubles, 10
Canadian Electrical Association, Convention, 1574
Canal rays and Doppler effect. By J. Trowbridge, (D.) 644
Canals, Electric haulage. By Henry, (D. R.) 983
Candle, Standard, Proposed international, 949, 1255, 1259, (D.) 1497
Candle-power (See Light)
Car weights, Relation to operating costs, 1527
Car wiring, Fire risks, (D.) 1040
Cars, Gasoline-electric:
——France. By M. Rousso, (D.) 579
——General Electric, *1267
Carbon:
——Discharge of electricity from glowing. By Pollock and Rancland, (D.) 742
——Manufacture, Soot in. By H. Caird, 415
——Production, Professor Ramsey's experiments, 765
Carbon arc, Election theory of. By J. A. Pollock, (D.) 742
Carbons, Tariff on, 898, 1017; By Hugo Reisinger, 1228
Carborundum and silicon, New applications, (D.) 1112
Carborundum manufacture. By M. L. Baraduc-Muller, (D. R.) 818
Carnegie Steel Co.'s ore bridge, *417
Catenary bridges for electric railways, *1119
Cathode-ray tube, Braun. By F. Giesel and I. Zenneck, (D.) 1602
Caustic soda and chlorine. By Donnan, Barker and Hill, (D.) 1233
Cell, Photo-electric, 481
Cell capacity formula. By W. Lulofs, (D.) 225
Cells, Wet or dry, for ignition system, 49
Cement for broken marble, 1389
Cement, H-O pipe-joint, 417
Cement mills, Motors in. By C. C. Batchelder, (D.) 695
Central-station business:
——Advertising electricity. By W. Plattner, 868
Denver and national sign advertising, 114
National advertisers and electric signs, 90
Tests of advertising copy. By J. L. Mahin, 1224
——Albany, N. Y. By W. H. Stuart, 737
——Amsterdam, N. Y., Methods, 807
——Analyzing a hydro-electric project. By H. von Schon, (D.) 224
——Automobile business (See Automobile business of central stations)
——Boonton, N. J., Development of lighting, 161
——British stations, Effect of metallic-filament lamps, (D.) 1496
——Brookline, Mass., 774
——Buffalo "electric talks," 1390
——Building up day load in small towns. By M. A. Harrison, 1308
——Charleston, Mo., Rapid building of power load, 1029
——Chicago "Electric Shop," *684
——Chicago, Statistics, 1575
——Commercial department, Rochester, *344
——Contractor, Relations with the, 960
——Contractor's canvass for residence lighting, Indianapolis, 507
——Cost of generating energy. By H. S. Knowlton, (D.) 513
——Cost of energy in nine Massachusetts stations operating mixed equipment, 329
——Cost of installing small stations, 263
——Daylight-saving legislation, 635
——Denver:
Holiday lighting, *347
Illuminating engineering department, 507, 1547
Renting show-window space, *972
Tungsten lamps increase revenue, 972
——Des Moines, Disposing of shopworn heating appliances, 1167
——Development of revenue, 1480, 1482
——Domestic electricity supply rates, Cooper system, 50
——Dubuque, Iowa, Sign campaign, 1168
——Earnings per kilowatt of capacity, 310
——Earnings of lighting plants, 536
——Enterprise in a Western town, 1305
——Fan motor and the central station, 535
——Fan motor experiences in New Jersey, New York and Boston and other cities, 558, 559, 560
——Financial results, Marquette, Mich., 403
——Flaming arcs on flat rate contracts in Chicago, 274
——Flatirons, Free, Marion, Ind., 453
(See also Flat-irons, Electric)
——Fort Wayne, Ind., 1307
——Free lamp renewals, Abandoned at Winona, Minn., 777
——Free lamp renewals, Future of, 766
——Heating, Electric, 5
(See also Heating, Electric)
——Herrin, Ill., 1102
——Holyoke, Mass., 922
——Hoopestown, Ill., *1224
——Humboldt, Iowa, Increasing day load, 1167
——Illuminating engineering at Denver, 507
——Inspection of consumers' installations, 1167
——Introducing household appliances. By J. O. Little, 51
——Lamp voltages and careless trimming, Method of checking, 219
——Lighting economies, 91
——Lima, Ohio, No municipal plant, 441
——Lincoln, Neb., Non-peak load, *343
——Local option and centralization revenue, 573
——London, St. Marylebone, Development, (D.) 1496
——Meter complaints at Paris, Ill., 920
——Meter-reading and billing methods, 1102
——Motor load development, 454
——Municipal plants:
Clinton, Mass., Report against municipal lighting, 621
Middleboro, Mass., 203
Washington, D. C., 265
Wellesley, Mass., 204
Winnipeg, Man., 205, 263
——Natchez, Miss., 1166
——New business notes, 1306
——Newark publicity work, 1008
——Newspaper advertising in Boston, 1198
——Oklahoma City, Publicity campaign at, 1167
——Outline lighting as non-peak load, *343
——Photographers, Increasing business among, 573
——Publicity policy, 683

*Indicates illustrated articles.

Central-station business: (Continued)
——Relations with public, 682, 1167
——Renewal costs of high-efficiency lamps. By J. F. Musselman, Jr., 401
——Review of situation, 92
——Rockford, Ill., Building up load, *1034
——Salesman and the sales manager, 973
——Special men and specializing. By H. H. MacPherson, 1390
——Statistics for 1907, 139, 142
——Summer business, Desirable, 1224
——Tariff, Effect of, on financial results. By Norberg-Schulz, (D.) 285
——Tungsten lamps:
Comparison with gasoline lamps. By P. M. Loewe, 1107
Discussion at convention, 342
Flat-rate, Marion, Ind., 454
Hartford service, 671, 929
Indiana, 401
Introducing, 1481
Iowa discussion, 1069
Lessons. By H. H. MacPherson, 402
Low-voltage, 1358
Rates, 5
Revenue reductions, 536
(See also Charging for electric current; Incandescent lamps, Tungsten)
——Uniform forms and methods, 1478
——Vaccuum cleaning, Co-operative, Chicago, 1546
——Vacuum cleaners, 1168
——Vacuum cleaners, Renting, in Minnesota, 806
——Washing machine load, New Ulm, Minn., 806
——Window-lighting proposition, Fitchburg, Mass., 972
——Winnipeg, Man., Controversy, 142
Central-station chart, Handy. By R. W. Knowles, *569
Central-station facts and factors, 1031, 1104, 1592
Central-station practice:
——Albert Lea, Minn., Steam turbines, 1523
——Apparatus, Electrical and steam, N. E. L. A. convention, 1466
——Blackboard map for showing service main and connection, 1390
——Boiler and engine-room routine in small central stations, 1570, 1592
——Combined lighting and heating system. By C. F. Holmboe, (D.) 879
——Cost keeping in the contracting department. By L. Kemper, 277
——Day loads, Profitable. By S. A. Fletcher, (D.) 1552
——Des Moines, Ia., *636
——Economies. By R. M. Jennings, 334
——Economy of production. By E. A. Bullock, 1301
